

THE AI COMMAND CENTER FOR YOUR ENTIRE FACTORY FLOOR.

Win the automation race.

Conduit partners with manufacturers to deliver **factory-wide AI automation in days**, not months.

Our Interoperable Orchestration Platform (IOP) gives manufacturers one command center to **automate every robot, machine, software, and sensor** on their factory floor.

Get in touch. Let's walk your floor together.

DISCOVER OUR PLATFORM →

www.conduit.inc

Your entire factory: coordinated, automated, and ready to scale.

SOLUTIONS INSIDE CONDUIT

Interoperable Fleet Manager

Deploy and coordinate new robots, machines, and sensors inside our hardware-agnostic, no-code platform.

Set traffic rules, assign tasks, and orchestrate in real-time to maximize efficiency.

Factory-Wide Automation Studio

Build and deploy AI workflows across robots, machines, people, sensors, and software.

Configure logic, trigger actions, and orchestrate entire processes in real time to eliminate bottlenecks and boost throughput.

Factory-Wide Analytics Studio

Analyze every robot, machine, system, and workflow through a unified, AI-native dashboard.

Use natural language to surface bottlenecks, monitor live performance, and expose the constraints holding output back.

AI Vision Kits

Track movement, behavior, and safety signals across people, forklifts, robots, and workstations with AI vision devices built for industrial environments.

Detect triggers, captures unsafe conditions, and generate real-time spatial intelligence to keep operations running safely and efficiently.

Machine Monitoring

Monitor machine health, status, and performance in real time.

Unify machine data across vendors and legacy equipment to detect faults early, reduce downtime, and improve uptime across your entire factory.
